

Clean Agent Fire Extinguishers

Aero Precision is H3R Aviation's International Stocking Distributor for Military Aircraft

H3R Aviation is the largest supplier of portable clean agent fire extinguishers to the aviation industry, offering high quality, UL listed halon and halon alternative fire extinguishers for the cockpit/cabin, cargo bay and flightline/ramp. Aero Precision is an authorized H3R Aviation distributor for military aircraft around the globe.

The Model RT-A600 contains a proprietary blend of the "liquid streaming agent," Halon 1211, and the gaseous "total flooding agent," Halon 1301. The blend's power lies in the Halon 1301, which is both a fire fighting agent and a propellant. This compact, lightweight extinguisher is low maintenance and ideal for helicopter flight crews.

- Lightweight aluminum canister
- Disposable
- Low maintenance - no recharging, servicing or pressure gauge
- Tested to ANSI/UL 711 and UL 1093
- Meets DOT requirements

Model RT-A600

The model C352TS Halon 1211 fire extinguisher is used on multiple military transport aircraft including C-130's. Although classified a "liquid streaming agent," Halon 1211 also performs remarkably well as a "total flooding agent," seeking out and extinguishing fires in inaccessible places. A 6-year maintenance and 12-year hydrostatic test are required.

- Rugged steel cylinder and all metal valve construction for exceptional durability
- Pressure gauge enables easy confirmation of charge
- Tested to ANSI/UL 711 and UL 1093
- Meets DOT requirements

Model C352TS

Aero Precision will be glad to provide you with a complete list upon request.
